As a highly skilled software engineer, I have had the opportunity to work for various companies in different industries, including but not limited to finance, insurance, and gaming. This has given me the chance to gain diverse experience and insights into the workings of different sectors. Additionally, I have had the pleasure of working closely with UI and UX, collaborating with product owners/managers to come up with solutions that solve business problems and ultimately improve user experience.

In 2016, I started getting involved in the cryptocurrency space, and since then, I have invested my time and effort in building several projects and packages that benefit the ecosystem. This has enabled me to develop a wide range of skills in this field, including blockchain development, smart contract development, and cryptocurrency trading.

Overall, my extensive experience has equipped me with the necessary skills to tackle complex projects, and I am always eager to learn and improve my craft.

## Knowledge

**Languages:** Javascript, Typescript and Python

**Databases:** PostgreSQL, MongoDB and DynamoDB

**Frameworks / Libs:** React, NextJS, Gatsby, React Native, NodeJS

**Cloud:** AWS

**Crypto:** BTC, ETH (L1 and L2), DOTSAMA

## Education

**Computer Science** - Universidade Federal de São João del Rei

- Computer Science
- 2014 / 2017 (incomplete)

## Language

**Portuguese:** Native

**English:** C2 (CEFR)

## Experience

**Violet** - Remote

*Staff Frontend Developer*

- Decentralized Exchange
- React, Typescript, Node, and a lot of crypto
- 2023 / now

In my previous role, I managed the company's digital asset exchange (DEX), from marketing and regulatory compliance to improving the user interface. My efforts established a strong DEX presence, leading to increased user adoption and profitability.

**Kraken** - Remote

*Senior Frontend Developer*

- Centralized Exchange
- React, Redux Toolkit, Node, and a lot of crypto
- 2022 / 2022

At Kraken, I worked on the VIP platform, creating user-friendly data visualizations and OTC dashboards. This helped our clients easily navigate and understand the necessary information. Working in a fast-paced environment, I collaborated with other professionals to meet strict deadlines. Through this project, I gained

experience in the cryptocurrency industry and developing my skills in data analysis and visualization as a professional.

**Blockchain.com** - Remote

*Senior Frontend Developer*

- Crypto Wallet
- React, Redux, Node, and a lot of crypto
- 2020 / 2022

At Blockchain.com, I was responsible for being a senior frontend developer. My role included developing and improving various platforms, such as the wallet, the exchange, and the explorer. With over 80 million wallets, Blockchain.com was one of the biggest players in the market.

**Game Analytics** - London - GB

*Senior Frontend Developer*

- Analytics for Mobile Games
- React, AWS, Node, UI and UX
- 2019 / 2020

At GameAnalytics, I was responsible for leading the frontend team and developing our new platform using React (with Context and Material UI). Our goal was to display and collect data from over 150 million users on a daily basis, in real-time.

**Intrasurance** - Lisbon - PT

*Frontend Developer*

- Insurance Company
- React, Redux, Azure DevOps, UI and UX
- 2018 / 2019

Intrasurance was a segment of Verzekeruself, one of the largest insurance companies in Europe. My task was to create a widget that could be embedded on customers' websites, providing them with a way to sell our insurance products. We used React and Redux to develop the widget.

**Norio Matsubara** - Faro - PT

*Full Stack Developer*

- Investor

- React, PostgreSQL, MongoDB, Node, Scrum, UI and UX
- 2017 / 2018

My job with Norio was to be his right-hand person. He is an investor who has capital invested in several startups worldwide, and my role was to analyze the technical aspects and provide assistance when needed. I worked in various fields, but primarily focused on reducing technical debt and implementing agile processes.

### **Mestres Ninja** - Curitiba - BR

*Full Stack Developer*

- Marketplace for Freelancers
- React, MongoDB, PostgreSQL, Python
- 2016 / 2017

I co-founded this startup with two friends. We developed a dashboard that enabled customers to hire freelancers in a way similar to Uber. The most active developers were notified and went to the customer.

### **Unlockers** - Curitiba - BR

*Full Stack Developer*

- Digital Web Agency
- jQuery, PHP, MySQL, UI and UX
- 2014 / 2016

Unblockers was my first experience with web development. Through this experience, I gained valuable insights into customer relations and became proficient in HTML, CSS, JS, PHP, and MySQL. I have built numerous small and medium websites, including those using Magento and WordPress, as well as simple static ones.
