Linkedin

I've been coding since I was 14, starting with JavaScript and learning Python afterward. I worked as a Software Engineer in Portugal, Netherlands, and the UK.

I'm interested in helping others to build new projects fast and efficiently. At the moment I focus mostly on React.

Effective communication is an essential tool I use for setting clear expectations with my clients and mentees. You will find in me a responsible and solid partner for your business.

I especially like giving my mentees the full picture of how things work. I'm very patient and passionate, so even if I don't know how something work I'll learn it and teach how you can do it too.

Knowledge
